Installing DSS Player Software

Be sure to confirm the following before installation:

- Exit all running applications.
- Eject the floppy disk if you are using one.
- If you are running Windows 2000/XP/Vista or Mac OS X on the network, you need to log on as an Administrator.

Windows

1 Insert Olympus DSS Player CD into the CD-ROM drive.

The installation program will start automatically. If the installation program does not start automatically, browse your CD-ROM drive and execute "launcher.exe".

2 The launcher will startup.

Select the language you would like to install from the upper-left pull-down menu and click [DSS Player Standard Installation].

3 The Install Wizard will begin.

Once you have consented to the licensing agreement, enter your name, company name, and license ID number (serial number). The license ID number is printed on the license ID card included inside the Transcription Kits package.

4 Proceed with the installation according to the instructions on the screen.

Macintosh

1 Insert Olympus DSS Player CD into the CD-ROM drive.

2 Double-click the CD icon.

3 Double-click the setup icon.

The Install Wizard will begin. Once you have consented to the licensing agreement, follow the instructions on the screen to complete the installation.

4 Proceed with the installation according to the instructions on the screen.

5 You will be requested to restart, so conduct a restart by following the instructions.
