RecMic II Configuration Settings

Check your recording environment

The noise analyzer function checks if your recording environment is good for speech recognition. Press the F1 and F3 button for more than 5 seconds. If the noise level is too high, the LED on the top will flash. It is recommended to change the environment when you see this sign.

Change Modes

Press the F1 and INSERT button for more than 5 seconds. By repeating this operation, it will toggle between the modes. You can confirm the recording modes by the color of the LEDs.
Blue = Quiet Environment
Green = Noisy Environment for Speech Recognition
Red = Noisy Environment for Classic Dictation

Change Modes

Press the NEW and INSERT button until LEDs from F1 to F4 will flash for 15 seconds. During this time, choose your preferred preset button modes from F1 to F4.
F1 = Olympus Mode
F2 = Custom Mode
F3 = Dragon Mode
F4 = Windows SR Mode

RecMic Configuration Tool
