Professional Dictation
made simple and stress free

DS-2600

Why do I need a dictation device?

Talking is much faster than typing. Save time and speed up your document creation. Digital dictation offers you more flexibility. To dictate anywhere, anytime - standing, sitting or even in a lying position. Meanwhile, you can do other things at the same time. This makes digital dictation easy and stress free.

Who is this device suitable for?

The DS-2600 is particularly suitable for small businesses or people who are just starting with digital dictation and need a professional starter device. The device can be used at work, at home or during meetings.

As an architect, I use the DS-2600 to record defects, deviations, agreements and protocol points. I can quickly operate it with only one hand in any situation, both in the office or on the construction site.

Do I have to hold the device while I'm speaking?

The omni-directional microphone picks up sound in a 360-degree radius. The Variable Control Voice Actuator (VCVA) starts recording when you start talking and pauses when silence starts.

No matter if it's boiling in several pots or both of my hands are in the dough bowl. With the DS-2600, I can record everything important via voice recording while taking care of food at the same time.

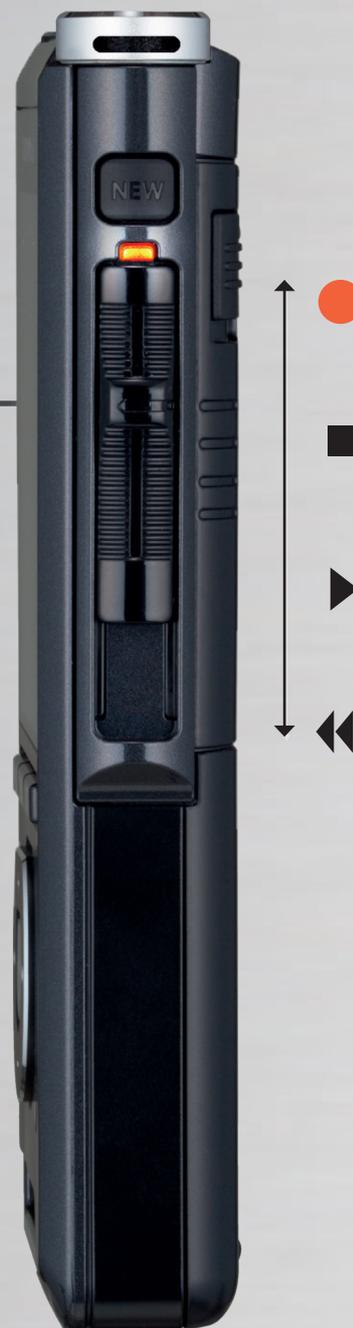

What makes dictation with this device so easy and stress free?

The DS-2600 is very easy to use with its various editing functions and the slide switch. Recordings can be easily started, stopped and ended. Its special ergonomics ensure that you can comfortably dictate for long periods of time.

Can I stop my recording or do I have to start a new recording every time?

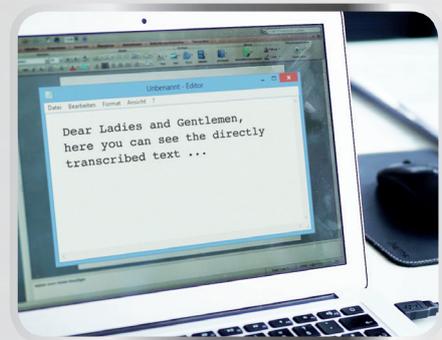

The robust slide switch on the side of the device makes it easy to start, stop, continue and stop recording. This way dictation is also possible on the move, because you do not have to look at the device while dictating.

Can I use the DS-2600 to have my dictations transcribed automatically or do I need a typist?

With the DS-2600, both are possible. The device can be used with various third party speech recognition software like Dragon NaturallySpeaking™, but needs to be purchased additionally. Besides Olympus provides various accessories to get your audio recording transcribed manually (e.g. AS-2400 Transcription Kit).

Can I change my recording afterwards?

With the included DSS Player standard there are a variety of editing options that offer the possibility to insert, overwrite, erase or cut files. Unwanted content can easily be amended or removed.
