The RecMic II Series are created to cater to the high demands of professionals who want excellent usability and results with speech-to-text solutions.

INTELLIGENT TWO-MICROPHONE SYSTEM. State-of-the-art noise cancellation technology creates narrow directionality that focuses on the acoustics in front of the microphone and cancels unwanted noise from the sides and back. Ambient noise is suppressed, insolating the spoken audio.

- Plug and Play, ready to use in seconds.
- Smooth surface to reduce handling noise and enhanced button noise suppression.
- HID Mode and the RecMic Configurator software offers customization of recording modes and keystrokes.
- Clickable trackball with smart cursor movement.
- Antimicrobial and Alcohol resistant housing for medical use.
- Simple and intuitive button layout.
